

Circles.→ Rules of Congruence:→ Rule 1: SSS - (Side Side Side).

$$AB = DE = 3\text{cm}$$

$$AC = EF = 4\text{cm}$$

$$BC = DF = 2\text{cm}$$

 $\therefore \triangle ABC$  is congruent to  $\triangle DEF$  ( $\triangle ABC \cong \triangle DEF$ ).
→ Rule 2: SAS (Side Angle Side)

$$\angle A = \angle D = 60^\circ$$

$$AB = DE = 5\text{cm}$$

$$AC = DF = 5\text{cm}$$

 $\therefore \triangle ABC \cong \triangle DEF$ 
→ Rule-3: ASA (Angle side Angle).

$$\angle A = \angle D = 95^\circ$$

$$\angle B = \angle E = 35^\circ$$

$$AB = DE$$

 $\therefore \triangle ABC \cong \triangle DEF$
