

Date ___/___/___ On killing A Tree

Q1) Growth of a tree is a long process; killing a tree is a longer process. Do you agree?

Ans) Yes, I agree. A tree takes many years to grow strong by absorbing sunlight, air, water, and nutrients from the earth. It cannot be killed by cutting it because it grows again. To kill a tree completely, its roots must be uprooted and exposed to the sun and air until they dry up.

Q2) How has the tree grown to its full size? List the words suggestive of its life and activity.

Ans) The tree has grown slowly by consuming the earth, feeding upon its crust, and absorbing years

sunlight, air, and water. The words suggestive of its life and activity are "consuming", "Feeding", "absorbing", "sprouting", "rising" and "expand".

Q3:- What does the poet mean by the bleeding bark?

What makes it bleed?

Ans:- The poet compares the tree to a living being.

"Bleeding bark" means the bark of the tree oozes sap when it is cut. It bleeds because it is hacked and chopped with a knife or an axe.

Q4:- The poet says 'No' in the beginning of the third stanza. What does it signify?

Ans:- The poet uses the word "No" signifies that hacking and chopping the tree are not enough to kill it.

The tree can recover and grow again unless it is uprooted completely.

Q5. What does the poet mean by the earth-cave?

Ans. The "earth-cave" means the deep place inside the earth where the roots of the tree remain hidden and firmly anchored.

Q6. What according to the poet can kill a tree?

Ans) According to the poet, a tree can be killed only by pulling out its roots completely from the earth and exposing them to the scorching sun and air until they become ~~brown~~ brown, hard, and wither.
